

March 28, 2025

**The Honorable Members of the Texas Legislature**

Texas State Capitol  
1100 Congress Ave  
Austin, TX 78701

**Subject: Ensuring Texas Remains a Leader in Economic Growth and Opportunity**

Dear Members of the Texas Legislature,

As members of [Texans for Economic Growth](#) and representatives of Texas's business community, we write to reaffirm our commitment to fostering policies that recognize and support immigrants' significant contributions to our state's economy. Texas has long been a beacon of opportunity, attracting individuals from across the globe who fuel our industries, expand our workforce, and strengthen our communities.

The [Texas Compact on Immigration](#)—launched in 2019 and endorsed by business leaders, chambers of commerce, and organizations statewide—outlines the principles necessary to ensure Texas remains competitive in a global economy. These principles emphasize the importance of smart immigration policies that uphold our values, enhance economic growth, and maintain public safety. Central to these efforts is preserving access to in-state tuition for long-term Texas resident students, a policy that has played a vital role in developing a skilled and competitive workforce.

For over two decades, Texas's in-state tuition policy has empowered thousands of Texas high school graduates to pursue higher education, leading to:

- **A Stronger Workforce:** Graduates contribute millions to our state economy annually, filling critical roles in industries like healthcare, education, and technology.
- **Increased Economic Activity:** Long-term Texas resident students with college degrees generate billions in additional wages, spending, and tax contributions.
- **Global Competitiveness:** Ensuring access to education helps Texas attract and retain talent, bolstering our standing as a top destination for businesses and innovation.

**Repealing in-state tuition would have severe economic consequences.** [Research](#) shows Texas stands to lose **\$461 million annually in economic activity**, including \$244.4 million in lost wages and \$216.9 million in diminished spending power. Such outcomes would not only harm affected students but also negatively impact businesses and communities across the state.

We urge the Texas Legislature to champion policies that harness the full potential of our state's diverse population. Supporting pro-business policies, including access to in-state tuition, is essential to maintaining Texas's reputation as an economic powerhouse.

As Texas business leaders, we understand the importance of pragmatic policies that strengthen our economy and workforce. By prioritizing smart, results-driven solutions, we can secure Texas' position as the best state to live, work, and do business.

Respectfully, the undersigned:
